

Flexshaft

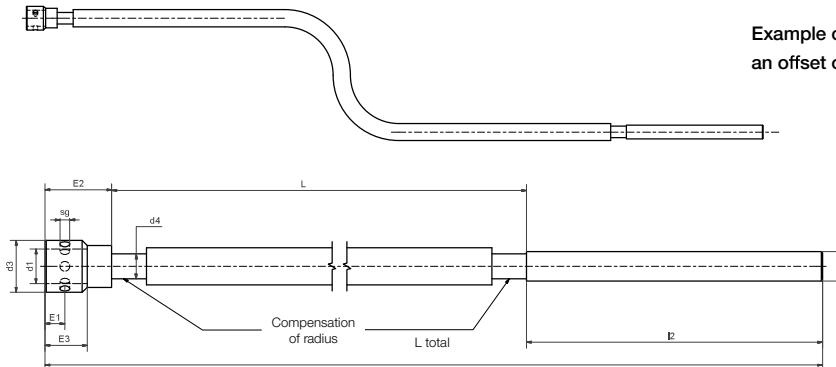

The ideal complement to drylin® linear modules. The flexshaft enables the positioning of the hand wheel independent of the installation position of the linear unit. Distance of 500 mm and offset by 85°? No problem!

- Lengths: 300 mm, 500 mm und 1000 mm (flexible area)
- Flexible shaft: burnished steel
- Plastic coating: Rilsan
- Connection piece: stainless steel 1.4305
- For all journal diameters (10, 12 and 14 mm)
- Flexible installation
- Space saving
- Can be combined with a bearing block ► Page 1042
- Position indicator, lead screw clamp, hand wheel available
