

Vertical separators are used if a vertical subdivision is required. In the standard configuration, a separator is mounted at every second E-Chain® link.

Vertical separators and spacers

● **Standard separator 8401 for E-Chains®** offers safe stability due to its wide base design, also when used with thick cables or hoses.

● Separators (e.g. "side mounted") for E-Chains® can be fixed in their position with **spacers 405.XX**. The available inner height will be reduced by 2 mm, per spacer and side. To avoid this, the parts can be assembled on outside of the crossbar (not for long travels) **XX = width of the spacer** (available 10, 15, 20, 30 and 40 mm)

Vertical separator for E-Chains®	
unassembled	8401
assembled	8411

Spacer* for E-Chains®	
unassembled	405.XX
assembled	415.XX

*For side-mounted applications
