Gliding applications | For long travels from 14m to max. 450m

Note: We recommend the project planning of such a system to be carried out by igus®.

In case of travels between 11 and 14m we recommend an e-chain® with a longer unsupported length.

Interior separation | To allow faster filling

Split separator, wide base/top*

unassembled	112.H.1
assembled	112.H.1.1

Split separators*
In order to fill e-chains® more easily and effectively, these separators can be split in the middle. This allows easier access to middle shelf partitions. Fast assembly and easy retrofit. 2 types available: with wide or narrow top.

Split separator, narrow top*

unassembled	112.H.2
assembled	112.H.2.1

Lean separator*

unassembled	112.12
assembled	112.12.1

Lean separators* New
New design allows extremely fast fitting of shelves in several layers, which significantly reduces assembly time. Enables extremely fast replacement of individual cables in a very full e-chain®.

Lean separator design - several layers of cables fitted quickly, save up to 50%* assembly time

(*Lean separator vs. standard separator - measured on a 4m long e-chain® fitted with 12 cables in the igus® readychain® factory)

More interior separation options

Notch locking separator*, lockable

unassembled	112.6
assembled	112.6.1

Notch locking separator for increased holding force
Notch locking separators* offer higher crossbar opening forces with high humidity and/or large hydraulic hoses. They can be positioned precisely and then locked in position.

Rollclip* for e-chains®

unassembled	489.27
assembled	490.27

Rollclip*
Minimises abrasion of sensitive hoses. Simply clamps onto the opening crossbar. The movable rollers compensate for relative movement between the e-chain® and hose.

*Only for e-chains®
