

SERIES 74

VULKOLLAN® TRANSPALLET ROLLERS STEEL CENTRE, WITH LABYRINTHS

Roller description

Tread: Vulkollan® tread, hardness 93 +/- 2 Shore A, excellent rolling resistance and elasticity, good resistance to wear and to tearing.

Centre: weldless steel centre.

Hub: The housing is obtained by moulding and turning and contains ball bearings series Z. The hub is available also without bearings. Labyrinths are protective plastic-rings, press-fitted in front of the ball bearings. They ensure longer life, protecting them from dust and foreign bodies that can restrict rotation of the roller.
